Program Name: Kentucky Office of Energy Policy Energy Education Workshop

Credit Hours: 6

Program Description

About the National Energy Education Development Project The NEED Project designs and delivers teacher- tested educational materials, evaluation techniques and tools, recognition of student achievement, and professional development for educators. NEED materials and training programs provide comprehensive, objective information about the scientific concepts of energy and the sources of energy – their use and their impact on the environment, the economy and society. About the Sponsor The Office of Energy Policy (OEP) is housed within the Kentucky Energy and Environment Cabinet. OEP is responsible for developing and overseeing energy-related programs and initiatives that align with the Governor’s Energy Strategy to promote secure, affordable energy resources and a strong economy. Grant-funded programs focus on energy education, affordability, and resilience and strive to fulfill OEP’s mission: To utilize Kentucky’s energy resources for the betterment of the Commonwealth while protecting and improving our environment. The Cabinet and OEP aim to achieve energy and environmental outcomes that are fair, robust, and balanced by providing programs that strive toward equity and environmental justice, and that are fair, neither showing favoritism nor being discriminatory. The NEED energy education program material is based upon work supported by the U.S. Department of Energy’s Office of State and Community Energy Programs (SCEP) under the State Energy Program Award Number DE-SE0001088.
